

# Canaloni di Isola delle Femmine

The dive starts at zone B close to the "islet" of Isola delle Femmine, on the north-west side. Here we descent on a rocky bottom at 20 meters and then move towards the west, descending up to 30 meters. Hereafter there is a possible descend to 35 meters from where a series of canyons start with walls rich in sea fans and ravines. A small shrimp cave hides in this rocky wall. Often you can encounter sea morays, octopuses, lobsters during this dive.
