

PADI Emergency Oxygen Provider

The first aid in all serious diving pathologies is the immediate **administration of oxygen**. Learn how to recognize when you need emergency oxygen therapy and how to administer it to a diver. Register now for a ***PADI Emergency Oxygen Provider*** at **Evasioni Blu Diving Ustica - Palermo (Sicily)**.

PADI Emergency Oxygen Provider Program

What you will learn during your PADI Emergency Oxygen Provider course:

- How to recognize diving pathologies that can be treated with emergency oxygen
- The different types of equipment in the emergency oxygen kit
- How to correctly prepare the equipment
- How to use a non-rebreather mask and an on-demand inspiration valve for breathing and non-breathing victims of diving accidents.

The PADI Emergency Oxygen Provider course consists of individual study and classroom sessions with knowledge development and workshop in preparation of emergency oxygen equipment and oxygen administration.

PADI Emergency Oxygen Provider Prerequisites

Anyone with an interest in learning how to administer oxygen for the first aid of aquatic accidents.

Credit/Certification PADI Emergency Oxygen Provider

By completing your course you will receive your **PADI Emergency Oxygen Provider specialty certification**. In some parts of the world the Emergency Oxygen Provider certification is a requirement to be able to administer oxygen in case of first aid.
