

# PADI Underwater Naturalist

On the next dive, try and look more carefully: you will see many more things. Look for symbiosis and predator/prey relationships and between aquatic plants and animal life. Learn not only to recognize certain fish and other animals while diving, but also how they interact with each other and with the environment. Sign up for a ***PADI Underwater Naturalist course*** with **Evasioni Blu Diving Ustica - Palermo ( Sicily )**.

## PADI Underwater Naturalist Program

What you will learn during your PADI Underwater Naturalist course

- The basic systems and classifications of **aquatic life**
- Interactions between aquatic living things
- The role of **aquatic plants**, food chains and prey / predator relationships
- How to interact responsibly with aquatic life
- The information that serves to identify dangerous marine life situations
- The point of view of the underwater naturalist on organisms and their roles in the environment

The PADI Underwater Naturalist course is divided into two main parts:

- Knowledge development (individual and classroom study).
- Two open water dives to practice underwater naturalist skills

## PADI Underwater Naturalist Prerequisites

*(Junior) Open Water Diver.*

## Credit/Certification PADI Underwater Naturalist

By completing your course you will receive your **PADI Underwater Naturalist specialty certification**. This certification can be credited as an adventure dive for your *PADI Adventure Diver* or *PADI Advanced Open Water Diver* course.
