

Parete del Faro

This dive site lies in the area of the lighthouse of Capo Gallo. The dive begins near the coast on a depth of about 5 meters, following a small ridge that points north-east and that drops down to 20 meters depth. This dropdown forms a vertical wall resting on a sandy bottom. This beautiful dramatically formed ridge is interesting and full of surprises. Fish sightings are frequent mostly bream, salpes, moray eels, octopus, cuttlefish and with a good look on the sand and you can spot numerous soles.
