

Punta Matese

This dive site is located near Sferracavallo, in the stretch of coast characterized by the presence of a circular antenna of the Coast Guard. The dive starts right behind the coast on a rocky bottom of about 8 meters. Once away from the coast the bottom begins to go descend to depths of 18 meters. The whole itinerary is characterized by massive rocks and many splits, cracks, small caves and burrows where bream, morays or octopuses may hide. This dive is simple but endearing; especially at night time this dive site is recommended.
