

PADI AWARE - Dive Against Debris

Help us stop the silent killer of the seas and oceans and fight marine litter. With the PADI Dive Against Debris program, you contribute to a clean and healthy future of our oceans: the data and reports you collect while diving, help us to inform, convince and urge politicians to find solutions to protect marine animals at risk. You can help a hand fighting **marine pollution** by registering now for a **PADI AWARE-Dive Against Debris** course with **Evasioni Blu Diving Ustica - Palermo (Sicily)**.

PADI AWARE - Dive Against Debris Program

What you will learn during your PADI AWARE - Dive Against Debris course:

- What is marine debris
- How it ends up in our seas and how it damages marine life
- How to plan and perform a Dive Against Debris dive safely
- How to weigh, sort, record, dispose and report waste.

The PADI AWARE - Dive Against Debris course is divided into three main parts:

1. Knowledge development (individual and classroom study)
2. Dive against debris diving at adopted dive site
3. Weighing, sorting, recording, eliminating and returning waste.
